Job vacancy:
Front End Developer

Profile requested:
Computing, engineering and science professionals
Computing professionals

Job location:
Amsterdam, The Netherlands

Job description:
The employer is a personal shopping platform born in the heart of Amsterdam. As Front-end Developer, you will be responsible for the development of the company website and various applications that support its personal shoppers. You will closely work together with the marketing and technology teams to make sure your changes will result in higher conversion. The company uses continuous integration and works according to Scrum.
The position will offer the following advantages: opportunity to be part of an innovative and fast-growing concept, a highly responsible position with lots of freedom and growth opportunities, a young, informal and crazy dynamic team, men's clothing from premium brands at wholesale prices and lots of high fives.

Key Responsibilities:
- o Development and improvement of the website
- o Designing new apps within our platform
- o Sparring partner for our tech team and marketing team

Requirements:
- o 3+ years of experience in front-end web development
- o Proven experience with HTML/CSS/JavaScript including modern JS frameworks (e.g. AngularJS), CSS pre-preprocessing (e.g SASS) and associated tooling (e.g. Bower, Grunt etc.)
- o Ability to work with other dedicated UI designers, turning designs into functioning user interfaces
- o An understanding of web performance, XSS, CSRF and cookies
- o Ability to work with Python/Django
- o Great communication skills, responsible and a team player in a Scrum environment
- o Fluent in English

Work starting date: **01-03-2015**
Form of employment: **full time**
Type of contract: **fixed term** *(at least 6 months)*
Gross monthly wage (Euro): **3500**
